PLANNING A COALITION.

Democrats and New Party Leaders in Kan-HAS CURED OTHERS,

Because Joint Electoral Tickets.

Special Dispatch to The Evenars Star.

Topeka, Kay., June 28.—During the past two weeks there has been several secret democratic caucuses in Kansas, at which the most prominent members of that party were present. Little is known of the transactions at these meetings, as the gentlemen present refuse to talk, but The Star's correspondent has learned that instead of "arranging for the fall campaign," as given out, the principal topic discussed was the advisability of forming a combination with the new people's party managers year on an electoral ticket. If the plan is carried out the democrats are to have five and the people's party four electors and both conventions will indores the nine. Propositions were submitted to the people's party managers yesterday and they are very anxious to make the deal, but a large element in the Farmer's Alliance refuse to coalesce with either of the old parties. Then, in view of the resolutions adopted by the national people'a party committee at St. Louis ten days ago declaring against fusion with any party or faction, the leaders of the new movement in Kansas are loth to enter into the democratic scheme. Of course such a combination would unquestionably take Kansas out of the republican column next year.

THE MASSES OFFORE THE DEAL.

While this feeling prevails among the leaders of the new movement in Kansas are loth to enter into the democratic party having all ways been a minority party in Kansas affords some lessons of the result of trailing their colors in the dust simply for office. In years of correct the days and heaves of the new natural propersions and proper into the democratic party having all grades of the new natural propersions and propersion of the result of trailing their colors in the dust simply for office. In years of other than the days into the desire and the later of the morning. Has been used for over FIFTY YEARS by MIT, LIONS of MOTHERS for their CHILDREN WHILE TEETHING, with PERFECT SUCCESS. It SOOTHES the CHILD, SOFTENS the GUMS, ALLAYS all PAIN, CURES WIND COLIC, and is the best remedy for DIARRHEA. Sold by Druggists in every part of the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other sind. Seconds a bottle. #15-1;

Out in the rural districts it is hard to tell which hates the alliance the worst, a republican or democrat. The democratic party having always been a minority party in Kansas affords some lessons of the result of trailing their colors in the dust simply for office. In years of prosperity when there were no bugs or worms, drouth or hot winds, to cause people to kick against the dominant party and issues were straight, the democratic party steadily gained, only to fall back and be demoralized by dropping into some coalition with the dissatisfied when the bugs and drouth came.

There are hosts of democrats in Kansas with convictions who do not live solely for the purpose of beating a republican out of office, and these men have the sap taken out of them occasionally on account of some dicker made with a new issue or party by a few of the leaders. So that a combine on a presidential electoral ticket by the democracy and people's party is not probable. If the headers.

We are determined that the victory so diligently sought and dearly bought shall redound to the benefit of WHOSOEVER will be benefited thereby. Are you old and worn and withered? unable to bear up under the curse, which is "By the sweat of thy brow shalt thousat thy bread," We have a neat, substantial and respectable Suit of Clothes for you at \$6.75.

At \$7.50 we can do better for you.

At \$8.50 we can give you a Suit of Clothes which is being retailed all around town at \$14.

But the NINE DOLLARides is to the dealer what the CLOSED see is to the possibility SEALER—be does not toral ticket by the democracy and people's party is not probable. If the democratic managers should agree to such a coalition there are hundreds and probably thousands of democrats who would vote the republican ticket. CLOSED sea is to the poaching SEALER—he does not recognize it all, but indules in big "cuss" words, which do not appear in the diplomatic correspondence twist "Johnnie Bull" and "Uncle Sam," hence we shall diplomatically "skip the gutter" and land on the other side with

NEW INFLUENCES AT WORK. The Australian Ballot System and the Farm

Special Dispatch to The Evening Star. Columbus, Onio, June 26.-Two new elements will enter into the Ohio campaign this year, which will keep the politicians guessing as to their effect. These are the Australian ballot law and the Farmers' Alliance. For the first time Ohio will vote under the new Australian ballot law this fall. As adopted in this parties to adopt emblems which will appear at the head of their respective tickets, thus enabling those voters who cannot read to select a ticket by recognizing the party emblem. It will be risky business, however, for such voters to undertake to "recently" ticket such voters to undertake to "scratch" a ticket. The only sure way open to them is to vote Are selling like hot cakes—If parents and guardians see fit to purchase of us instead of paying a hundred per cent elsewhere—It's their afair and clearly indicates that they know "a hawk from a hand card."

VOTERS AFRAID OF THE SYSTEM. There is no use trying to disguise the fact, however, that the new system of balloting has a terror for a great many voters, who do not a terror for a great many voters, who do not clearly understand it and imagine it is a great deal more complicated than it is. The Star correspondent has talked with chairmen of committees of both parties and learned from them that they fear that many will remain away from the polls for fear of betraying their ignorance of the provisions of the new law. They fear this will operate so extensively as to considerably reduce the total vote in the state. Of course this detection will included state. Of course this defection will include the illiterate and less intelligent element of the voting population and neither party is ready to admit that it will lose on this account any more

AS FOR THE FARMERS' ALLIANCE. As for the Farmers' Alliance, the part it wil take in the campaign is yet undetermined. In all the counties the farmers are bestirring

coming campaign, saying that notwithstanding the declarations of some of the enthusiastic convention orators the party has no walk over this year. His idea is that while the nomination of McKinley for governor was perfectly proper and the logical action of the party, it prevents the party from taking advantage of the local dissensions of the democrats, as they could do were the candidate for governor not a national character.

"As it is," says Secrétary Ryan. "we will not have simply Campbell or Neal to fight, but the solidly arrayed anti-high tariff party, who will forget in their zeal the local dessensions and join hands on the tariff question."

not been allowed to cease since the election of last fall.

"We could begin the campaign today," says Secretary Alberry, "and not have one thing of the usual preliminary work of organization to do. All our county organizations have been retained and kept in working order."

Of course this means a great deal, especially since Chairman Hohn of last year is also to be chairman of the executive committee this year, and possibly Secretary Alberry will be induced to accept the secretaryship again.

THE "SPRING" CURRYCOMB.
A comb that combines the strength of metal with the elasticity of a brush. The flembility of the loops makes this comb a wonderful device. A FLW POINTS. "It is as soft as a brush," because the loops give and enable the combant surface to get down into the hollows and slip over the elevations, to the great comfort of the animal and the great convenience of the hostler. "It is a perfect self-cleaner," and "The best shedder known," because it is a spring and the vibration of the coils readily frees them from all dirt and hair. "It cleans a horse quicker and better than other comis," because it has \$20 teeth \$4 tch do not track, and because it "does not grate harashly over the surface," but accommodates itself to any and all parts of a horse, from his ears to his heels. "It is a very strong and well-made comb," since the coil is made of very tough spring stee, and the shank is cast malleable and all parts are riveted together. "Its teeth do not bend out of shape" from rough usage, because of its circular form, and because it is elastic. "The back is an excellent sweat scraper." The reasons are apparent. Indorsed by experts and the trade everywhere. Can be had of hardware, harness, leed and grocery stores. A. DEPUE & SON, Flour and Feed Dealers, Soie Agents, SIS and SOU 45 st. s. w. my11-3m LOYDON, June 26.—The admiralty is prepar ing to add considerably to the strength of the British squadrons in American waters, partly British squadrons in American waters, partly with a view to enforcement of the close period in the Bering soa and partly, also, for an efficient assertion of British interests in the various complications now existing on the American continent. The Chilian troubles have lasted so long, with no apparent prospect of a settlement, that an extra force of British war vessels will be required, in all probability, on the Chilian coast for several months to come, while the situation in Hayti and Venezuels also calls, for the watchful oversight of English cannon. In addition to these transitory grounds for increasing the naval force in the Atlantic and Pacific Lord Salisbury is steadily bent on increasing the English garrisons in America, and especially in the West Indies, where the men are kept convenient for service anywhere.

Special Dispatch to The Evening Star Columbus, Onto, June 26 .- The Evening Press publishes on what it claims is unquestionable authority that at the Mansfield meeting of Secretary Foster, Senator Sherman and Maj. Mc-Kinley this week a proposition to the Knights of Labor leaders, now in session here, relative to the trouble with the printers in the bureau of printing and engraving was prepared and was presented to the Knights of Labor executive committee last night, by whom, after long discussion, it was rejected. The executive committee at once issued a call for a convention of presidents of the local assemblies of this state to meet here tomorrow to inaugurate a fight upon McKinley.

A dispatch from Vienna says that there is but little prospect of the speedy establishment of gold currency in Austria-Hungary. Dr. Steinbach, the new Austrian finance minister, is opposed to any course that would tend to weaken or impair the confidence of trade.

A Copenhagen dispatch says that the Danish government is entirely unfavorable to the scheme to depopulate Iceland and will not permit any movement beyond ordinary emigration. The government is convinced that if the population should go on it would be impossible to replace it and Iceland would become, like Greenland, a mere trading post in the far north. The Icelanders, however, are said to favor anything that will give them a better chance for living.

all the counties the farmers are bestirring themselves and in many of them farmers it ickets are already in the field. They will undoubtedly cut quite a figure in the election of members of the legislature, and while the number of farmers elected may not be large there will be few members elected who do not pledge themselves to stand by the main features of the resolutions adopted in the state farmers' meeting here two months ago. As to a state ticket the farmers seem perfectly satisfied with their treatment from the republicans in giving them the nomination for lieutenant governor in the person of Col. A. L. Harris of Preble county, a practical farmer. Should the democrate cencede them as much all thought of nominating any state officers will no doubt be abandoned.
